Abstract: The NPS is authorized by the National Park Service Protection Interpretation and research in System (54 USC §100701) to collect this information. The NPS is requesting approval to use mobile and web-based applications (e.g., iNaturalist, eBird, etc) as a means to collect natural history observational information from park visitors during citizen science events. The information will be used to substantiate the occurrence of plant, wildlife and invertebrate species within NPS units during these events. By using citizen science applications, this information will be immediately available to all parks and others interested in species identification and advancing the knowledge of the natural world. Using mobile and web-based applications will enable parks to increase the number of natural history observation records that will contribute to greater understanding of the biodiversity within the park systems.
